Martin Matula, R&D optical coatings

m.matula@liss.cz

Introduction

LISS belongs to the strong family-owned corporation BCI group. On the Central European market, it offers its services in the field of high-tech surface treatment aesthetics and functionality with broad coating technology and production of high-precision watch components either production of precision components for the automotive industry.

LISS has been operating on the market since 1991 and is primarily focused on innovation, our own development, and the introduction of new technologies and procedures that helps meets demanding requirements for high-end coatings.

Martin Matula, R&D optical coatings

m.matula@liss.cz

We offer

- *Development of hard wear resistance coatings*
- *Development of low friction coatings*
- *Design and Development of optical coatings*
- *Metallization of non-conductive substrates*
- *Combination of different surface and coating technologies*

We are looking for

- 1.COOPERATION ON NEW PROJECTS
- 2.NEW BUSINESS OPPORTUNITIES
- 3.R&D COOPERATION
