

We are a young, dynamic company specializing in the development of innovative concepts in the automotive and commercial vehicle sector as well as in professional lighting systems (headlights & lights). As a partner to the automotive, commercial vehicle and mechanical Engineering industries, we are looking for you to strengthen our team!

Intership (All Genders) – Technical Development & Sustainable Innovation

📍 **Location:** Wien/Stegersbach/Steyr | ⏳ **Duration:** 1-3 months (by arrangement)

🏠 **The Company:** G² Industrial Engineering GmbH

Welcome to the future!

Are you enthusiastic about technology, would you like to help shape sustainable innovation and gain your first practical experience in an innovative company?

Diversity and equal opportunities are important to us - which is why we particularly encourage women to apply.

🎯 Your mission - driving innovation forward

Depending on your interests and qualifications, you can get involved in one of the following areas:

- **Mobility turnaround:** Development of photovoltaic battery maintenance module for trucks incl. demonstrator setup
- **Programming & UX:** Development of a user interface for light demonstrators (microcontroller programming, Raspberry Pi)
- **Hardware development:** design of innovative lighting modules (electronics, EMC, LED technology, software development)
- **Sustainability & circular economy:** research into new materials and their optical properties for additive manufacturing

💡 Your know-how counts

- Ongoing studies in a technical field (e.g. mechatronics, electrical engineering, computer science, materials science, physics)
- Interest in future-oriented technologies and sustainable solutions
- Basic knowledge in one of the areas: Electronics, programming, CAD design or materials technology
- Analytical thinking & structured way of working
- Enthusiasm for interdisciplinary collaboration
- Very good knowledge of German and English

⭐ Why G² Industrial Engineering?

- ✓ Practical insights into real development projects with direct impact
- ✓ A dynamic & supportive team where diversity is valued
- ✓ Flexible working hours & home office options
- ✓ Practical insights into innovative technologies
- ✓ Top transport connections & modern equipment for an optimal working environment

💰 **Salary:** From € 1.700 gross/month

Get started now!

Take your chance and gain valuable practical experience in an innovative company!
